Cataract operations are successful in restoring vision in more than 95 cases out of 100. With the use of a special eyeglass lens, contact lens, or lens implant, clear vision is again possible.

Falls account for many eye injuries among older people. Keeping stairs and hallways well-lighted and clear of obstructions will help make your home a safer place for everyone.

## Staff Members Perkins, Sheffield Gain AAWB Certification

Two Sight Center staff members were recently accorded professional recognition in their fields by the American Association of Workers for the Blind.

Permanent AAWB certification as a rehabilitation teacher was granted to Gail Sheffield, a Sight Center employee since January, 1980.

Provisional AAWB certification as an orientation and mobility instructor was awarded to Sue Perkins, who joined the Center in September, 1980.

AAWB certification recognizes academic achievement as well as professional competence. It demands continuing study beyond the bachelor level of those who seek it.

Miss Sheffield holds a Bachelor of Science degree in home economics from Southern Illinois University, plus a Master of Science degree in textiles and clothing from Northern Illinois Univer-

Gail Sheffield Sue Perkins

sity and a Master of Education degree in rehabilitation teaching of the blind from the same university.

Miss Perkins earned her Bachelor of Science degree at Eastern Michigan University, majoring in education of the visually impaired, and a Master of Education degree in peripatology (orientation and mobility) from Boston College.

## WILL POWER

*Needy clients never have to pay for the services they receive at the Sight Center, but the demand for these services, and the cost of providing them, increases every year. Our Endowment Fund is much smaller than that of many non-profit agencies; one of the methods by which we hope to build it is through pooling the thoughtful gifts of benevolent donors.*

*Since our founding in 1923, a growing number of caring people has included us in their wills. Some helped support the Sight Center's operations with modest gifts from time to time, but were able to make substantial gifts by means of their wills after the needs of their families had been met.*

If you have included the Sight Center in your will, we would like to thank you. Many options are open to a testator, including deferred giving — in which one or more trust funds is established to insure financial security to spouse or children, with a portion designated to the organization of choice.

If a bequest after death is not the way you prefer to give, it is possible to honor the memory of a friend or relative while providing a living gift through a memorial contribution to the blind community. These gifts are tax-deductible; a permanent record is kept on file at the Sight Center, and they are promptly acknowledged by notifying the family of the one remembered (without mentioning the amount).

Gifts to mark joyous occasions, such as graduations, anniversaries, retirements, are another tax-deductible method of honoring friends and relatives.

### An Unusual Gift

Bob Burks, a frequent Sight Center volunteer, has an unusual hobby: the Champion Spark Plug Co. retiree makes decorative floral pieces in metal, welding or brazing the metal blossoms and leaves to tubular copper stems, then implanting the parts into a stained, varnished tree block. He donated such a piece to the Center last summer. Above, executive director Barry McEwen accepts the finished piece, which now stands in the reception area, from the artist.

## Boost for Sheltered Workshop: NIB Membership Awarded

Membership in National Industries for the Blind was awarded to the Sight Center in July after months of intensive scrutiny of its operations by the NIB's screening committee.

The Center's workshop thus becomes the 103rd in the United States to qualify for NIB membership out of an estimated 500 around the country.

The NIB program assists associated workshops in acquiring sub-contract work from government and industry.

The positive long-range implications of the announcement were hailed by William Marti, president of the agency's board of trustees, who said the status

conferred by NIB membership is sure to have a strong, favorable impact on the workshop's operations.

NIB was formed in 1938 after passage by Congress of the Wagner-O'Day Act, which gives priority to qualified workshops for the blind over competitive industry in the production of certain commodities bought by the Federal government.

The act was amended in 1971 to give similar but lesser legislative preference to workshops employing other kinds of handicapped workers.

## No One Shoves Bob Tilton Around

Working temporarily from a wheelchair in his Ottawa Hills, O., condominium, Bob Tilton is on the telephone constantly as management consultant and theatre operator.

When Bob Tilton was 10 years old, growing up in Upper Sandusky, O., he learned that he was diabetic after suffering a severe sunburn on his legs that failed to heal properly.

One way or another, he's had to deal with the reality of diabetes all 27 years since. One can pretty well chart the history of this man's life by observing the progress of the disease and noting its impact on his health and career.

In 1963, as a brand-new graduate of Upper Sandusky High School, he took his first serious job: a combination usher/projectionist with a nationally-known theatre chain.

He fell in love with the business on the spot. In fact, he's still in it . . . but in quite a different way these days.

When his sight failed from diabetic retinopathy in 1978, he became a client of

the Sight Center, taking extended disability leave from the job. Impatient to get back to work, he concentrated on mobility training, learning to get about independently using a white cane.

But late in 1979, diabetes dealt him another body blow: both kidneys failed, forcing him to undergo machine dialysis three times a week at St. Vincent Hospital, Toledo, while a search was instituted for a donated kidney.

After exhausting all other possibilities, he agreed to a kidney transplant from his mother, Edith Tilton, then 61; in April, 1980, the successful operation took place — one of the few favorable health breaks he'd had for a long time.

## Betty Jo Payne Chosen Poster Girl for 1982

Former Sight Center client Betty Jo Payne is a busy girl these months.

Among other things, Jo, as she likes to be called, has been chosen Poster Girl for the Monroe County, Michigan, 1982 United Way campaign.

Jo underwent mobility training with Sight Center instructors Sue Perkins and Mary Reiff during summer months in 1980 and 1981.

When she received her diploma at Bedford (Michigan) High School's graduation exercises in the University of Toledo's Centennial Hall last May 28, the entire senior class — all 350 members — plus faculty and guests, gave her a standing ovation as she walked up the

aisle to accept the parchment.

From June 6 to July 1, she lived and worked at the Leader Dogs for the Blind school, Rochester, Mich., where she got to know her 2-year-old dog, "Brute", a 93-pound, part-Labrador Retriever - part-German Shepherd, and where he got to know her.

Brute is a constant companion as she travels around Monroe County doing her part in the United Way effort.

"It's hard work, but it's fun, too," she said of the 13-plus hour days she puts in regularly.

Jo is the daughter of Mr. and Mrs. Jay Payne, Crabb Road, Temperance, Mich.

## GLASS COLLECTION

*Volunteer David Jones, better known for the many hours he spends driving the Sight Center's van, pitched in to help sort some of the thousands of donated glasses.*

A summer-long campaign to collect unwanted eyeglasses has brought an estimated 15,000 pairs into the Sight Center for processing, with some still dribbling in.

The glasses are sorted by volunteers who put aside for salvage those with gold-plated frames. The money thus raised is used to help finance many of the Center's social service programs.

The remainder are given to the Lions Clubs, which forward them to Kent State University, where they are catalogued according to prescription numbers and sent to Central and South America for distribution in areas where modern eye-care facilities are not available.

"By any standard of measurement, the program is a success," said Barry McEwen, executive director, who thanked the United Savings & Loan Association for donating its downtown headquarters and branch offices as collection centers, and the Toledo area broadcasting community for helping publicize the effort.

The collection will be repeated in 1983. Meanwhile, unwanted eyeglasses may be dropped off at the Sight Center.

## Faces Change in Intern Program, But Everyone Benefits

The new face at the Sight Center these months belongs to Deborah Carville, who began an 11-week internship in rehabilitation teaching Sept. 7 as part of her master's degree program.

The Orono, Maine, native is a 1981 graduate of the University of Maine, where she earned a bachelor of arts degree in elementary education. She will complete her internship Nov. 19.

Five other interns have served at the Center since publication of the spring newsletter in May.

Kenneth Cooper, of the Bronx, N.Y., MA, Boston College, a rehabilitation teaching intern, entered the Irish Christian Brothers, a Roman Catholic teaching order, in late summer and is now a full-time student at Iona College, New Rochelle, N.Y. He is scheduled to take his first vows some time next summer, and will become a teaching brother, not a priest, upon completion of his studies, his family said.

Helene Jospe, MA, Boston College, of Montreal, Quebec, Canada, also a rehabilitation intern, began employment Sept. 1 as a rehabilitation teacher with the Atlanta Area Services for the Blind, Atlanta, Ga.

Jeannine Gassman, of Cleveland, BA, Cleveland State University, who completed a 10-week internship in orientation and mobility Sept. 3, has returned to Cleveland and is seeking employment.

Sheree Lloyd, of Stryker, O., who interned in social work from late March until mid-June, was graduated from the

University of Toledo in June with a bachelor of arts degree. She lives with her family in Stryker and is also seeking employment.

Kelly Eastman, formerly of Monroeville, O., also a June, 1982 University of Toledo graduate with a major in social work, worked briefly at the Sight Center upon completion of her internship in June. She now lives in Southgate, Mich., and is planning to be married in November, according to her parents.
